

short profile

Althesys is an independent professional firm, **specialised in strategic advisory** and in the **economic research in the environment, energy, utilities and infrastructures industries.**

It helps companies, institutions and public bodies in developing knowledge and in defining strategies in an innovative and pragmatic way.

Althesys has a wide know-how and its team, composed by professionals with over **twenty-five years of experience**, brings together qualified and multidisciplinary competences of academics, consultants and managers who are expert in strategic, financial and management consulting.

The team **is headed by Alessandro Marangoni**, Chief Executive Officer, economist and expert in strategy and corporate finance, with a great experience in the environmental and in the energy industry.

Althesys provides strategic consulting and creates knowledge in key sectors, such as **environment, energy, utilities and infrastructures.**

Among the several projects it has done: advisory and studies in the energy industry, strategic plans for local utilities, advisory on environmental policies in various industries, strategies and evaluations of waste separate collection and recycling systems, advisory for mergers & acquisitions and joint ventures, cost-benefit analysis of plants, infrastructures, projects, and policies in many sectors.

All the projects are done with a specific philosophy based on original and not predefined solutions, international approach, methodological soundness, independence, and results orientation.

Althesys is a consultant for some of the major companies, organizations and institutions in the energy, environmental and utilities sectors, carrying out studies and projects aimed at value growth strategies.

Althesys creates knowledge also through some observatories. They develop analysis, have their own information database, monitor market trends, creating and publishing reports and studies.

Althesys developed **Irex Monitor**, a think tank which from 2008 studies the renewable industry and publishes Irex Index on the Italian pure renewable listed companies. It makes the **Agro-energy Observatory**, focused on the energy linked to the agriculture and the **Observatory on recovered materials MP2**, which studies the commodities of the recycling industry.
